

CLOUD OR ON PREMISES.

Your experience platform. Your deployment choice. Nexus Signage, Nexus Queue and Nexus Surveys are each offered in the cloud or installed on premises, according to your requirements.

Cloud

Nexus Cloud runs as a cloud deployment.

On premises

Nexus Cloud is installed on your own servers.

QUESTIONS TO ANSWER BEFORE YOU CHOOSE.

The choice is about where the platform runs, not which products you get. Your Nexus Cloud team works through these questions with your IT, security and procurement teams.

Data policy

Where your organisation's policies require operational data, such as content, ticket and feedback records, to be held.

Operations

Who will run servers, updates and backups if the platform is installed on premises.

Network

How your locations, screens, kiosks and counters will connect to the platform.

Security review

Which assessments and documents your security and procurement teams need.

Scale

How many locations, screens, kiosks and counters are in scope now and later.

What we confirm with you

Technical requirements, sizing and infrastructure are confirmed for your environment during evaluation. They depend on your locations and your choice, so they are not published as generic specifications.

Next step. Book a demo or contact sales at www.nexus-cloud.co.

Capabilities described are those available in October 2026. Supported devices, limits and integrations are confirmed for each project. Images are illustrative.
