

HOW IT WORKS

NEXUS SIGNAGE, STEP BY STEP.

Design, schedule and publish content to screens across every location, and see what each screen is playing.

Illustrative scene. Screens show fictional content.

1

DESIGN

A template gallery and a layered designer for on-brand content in landscape, portrait and custom formats.

Template gallery

Visual designer canvas

Central media library

2

SCHEDULE

Playlists with exact timing, and schedules by date range, weekday and time of day, with conflicts flagged.

Playlist builder

Schedule builder (date range, play times, days)

Schedule conflict flags

3

PUBLISH

Groups, tags and a map to organise screens by site, and one action to update many of them.

Screen groups

Set content to a screen group

Publish a design to screens or groups from the designer

4

MONITOR

A dashboard, playback reports and notifications, with named users and custom roles.

Screen Manager with now-playing status

Network dashboard

Play records per media item

Cloud or on premises, according to your requirements. One console and one sign-in for every Nexus Cloud product. Technical requirements are confirmed for your environment.

See it in your environment. Book a demo at www.nexus-cloud.co.

Capabilities described are those available in October 2026. Supported devices, limits and integrations are confirmed for each project. Images are illustrative.
