

OVERVIEW

NEXUS SIGNAGE.

Digital Signage Management

Illustrative scene. Screens show fictional content.

THE PROBLEM

Head office cannot see what each location's screen is showing without local confirmation.

Screen content held on local drives and USB sticks is hard to find, reuse and keep current across sites.

THE PRODUCT

Design, schedule and publish content to screens across every location, and see what each screen is playing.

HOW IT WORKS

Design. Templates and a visual designer for on-brand screen content.

Schedule. Playlists and time slots for every screen group.

Publish and monitor. Push content to screen groups and see what is live.

THE OUTCOME

Every screen, its status and what it plays

Head office can see the state of the estate without relying on photos or calls to each site.

One library for everything on screen

Teams find the approved asset quickly, and every screen draws on the same source.

Templates for every campaign and format

Teams produce consistent content in-house, without starting from scratch each time.

Plan when every item plays

Morning, weekend and seasonal content changes on time, without someone at each site.

Cloud or on premises, according to your requirements. One console and one sign-in for every Nexus Cloud product. Technical requirements are confirmed for your environment.

See Nexus Signage on your screens. Book a demo at www.nexus-cloud.co.

Capabilities described are those available in October 2026. Supported devices, limits and integrations are confirmed for each project. Images are illustrative.
